kyledennis099@gmail.com • +639930162099 • General Trias, Cavite, Philippines

Education

Cavite State University – Trece Martires City Campus 2022 – 2026
Bachelor of Science in Information Technology General Trias, Cavite

Experience

LabsToGo Virginia, USA
Full Stack Developer May 2024 - October 2026

- Built and shipped a Flutter booking app (iOS/Android) used by 1,000+ patients to schedule at-home lab tests, maintaining a 5 star store rating.
- Developed a responsive Next.js web platform for patient bookings, improving booking completion by 90% and supporting 50 bookings per month.
- Designed and maintained 50+ REST API endpoints in NestJS serving both mobile and web clients.
- Integrated Firebase Authentication, Stripe, Twilio, and SendGrid for secure authentication, payments, SMS notifications, and email communication.
- Collaborated with designers, QA engineers, and project managers in an Agile team to deliver production features.
- Set up Codemagic CI/CD for automated iOS and Android builds, reducing release prep from 1 day to under an hour.

Servebeez Cavite, PH
Web Developer Intern February 2026 - May 2026

- Developed responsive web applications using Next.js.
- Improved SEO by optimizing meta tags, adding XML sitemaps and structured data, and fixing Core Web Vitals issues to improve search visibility.
- Integrated Google Analytics and advertising scripts to track campaigns and conversions across multiple client websites.
- Collaborated with senior developers to deliver new features and bug fixes.

Celebreak Barcelona, Spain
Flutter Developer November 2024 - February 2025

- Contributed to TownSquare, a Flutter community engagement app with 100,000+ users.
- Built 20+ reusable UI components following responsive design principles, speeding up feature development.
- Improved application performance and UI responsiveness across Android and iOS devices.
- Collaborated with cross-functional teams to deliver new features and improve user retention.

Avyan Global Nueva Ecija, PH
Flutter Developer June 2022 - March 2024

- Developed blockchain-enabled Flutter applications integrating decentralized technologies and REST APIs.
- Implemented state management with Bloc and Riverpod to handle real-time blockchain transactions.
- Integrated REST APIs connecting mobile apps to backend services, working closely with designers and backend developers.
